## **Solar System Lesson Worksheet**

Directions: Answer each reflective question using prior knowledge as well as what you learned from the lesson today.

1. Were you surprised by the distances between planets? Did you think they would be closer or further?

---

---

---

2. Is there any planet larger than the sun?

---

3. What are two things you noticed about the sizes of the planets in relation to each other and the sun?

---

---

---

4. List the planets in their order from the sun, starting with the closest and ending with the furthest. (If you get stumped, ask a partner for help!)

1.

2.

3.

4.

5.

6.

7.

8.
